DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-2, 4, 10-11, and 33-37 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 4, 10-11, 32-34, 40, and 46-48 of copending Application No. 09/869,975. Although the conflicting claims are not identical, they are not patentably distinct from each other because each claim a glass/plastic composite wherein the composite film comprises a glass film having a thickness of between 10-500 micrometers and a polymer layer applied to a surface of the glass film having a thickness of 1-200 micrometers with an optical retardation of not more than 20 nm, a surface roughness of less than 30 nm and a waviness of less than 100 nm.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

3. Applicant's arguments, see pages 6-10, filed September 8, 2003, with respect to claims 1-13 have been fully considered and are persuasive. The 103(a) rejection of claims 1-13 has been withdrawn. The prior art of record does not teach or suggest a glass/polymer composite having the particular physical properties as exemplified in the present claims.

Claims 3, 5-9, 12-13, 26-32 and 38-40 are objected to for depending from, either directly or indirectly, rejected claims 1-2, 4, 10-11, and 33-37 which are provisionally rejected under obvious type double patenting as set forth above.

Conclusion

4. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on October 2, 2003 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1775

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
